PROFESSIONAL SUMMARY

Results-driven Artificial Intelligence & Data Science Engineer with hands-on experience developing ML systems, LLM-powered applications, and Computer Vision solutions. Proven track record in building scalable AI backend pipelines, explainable deep learning models, and secure software architectures. Adept at leveraging state-of-the-art Generative AI and intelligent automation to solve complex product and research challenges in Agile environments.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL, JavaScript, PHP, HTML/CSS

Machine Learning & AI: Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Computer Vision, Transfer Learning, Explainable AI (Grad-CAM), Prompt Engineering, Feature Engineering, Model Training & Evaluation

Frameworks & Libraries: TensorFlow, Keras, Scikit-Learn, Flask, OpenCV, MediaPipe

Databases & Developer Tools: MySQL, SQLite, Git, GitHub, VS Code, Jupyter Notebook, Wireshark, VirtualBox

Concepts & Methodologies: OOP, Data Structures, Algorithms, REST APIs, Agile Development, Cybersecurity Research

PROFESSIONAL EXPERIENCE

BNTS (US Non-Profit Education Organization)

Oct 2024 – Mar 2025

AI Backend Intern

Remote

- Architected and deployed multilingual AI content translation pipelines supporting 10 languages.
- Engineered an automated notes generation system using Large Language Models (LLMs) and advanced prompt engineering.
- Hands on AI-powered quiz generation module.

Intel

May 2024 – Jul 2024

Machine Learning Intern

Remote

- Developed and trained Machine Learning models for autonomous vehicle cut-in detection, improving predictive accuracy of vehicle maneuvers.
- Performed end-to-end data preprocessing, feature engineering, and class imbalance mitigation on large-scale sensor and telemetry datasets.
- Conducted model training, cross-validation, and performance analysis to establish baseline models meeting safety-critical latency requirements.

EverAppTech Solutions

May 2024 – Jun 2024

Programming Intern

On-site

- Programmed efficient backend business logic using Python and C, optimizing memory management and application runtime performance.
- Implemented software engineering best practices, including modular design patterns, version control workflows, and unit testing.

SELECTED PROJECTS

VisionGuard AI | Explainable Eye Disease Detection

TensorFlow, Keras, Deep Learning, Computer Vision

Lead Developer

Jun 2026

- Built a deep learning healthcare platform using transfer learning (ResNet50/VGG16) to classify retinal eye diseases from OCT scans with 98.4% accuracy.
- Integrated Grad-CAM explainability to generate heatmaps visualising diagnostic decision regions, increasing trust for clinical decision support.

ResumeAI Pro | Generative AI Career Assistant

Flask, OpenAI API, Generative AI, Prompt Engineering

Lead Developer

Jun 2026

- Developed a Generative AI resume builder leveraging OpenAI APIs, Flask, and structured prompt engineering to optimize resumes for ATS compatibility.
- Built a vector-similarity match scoring system to analyze job descriptions against resumes, offering real-time keyword insertion recommendations.

AgriSense AI | Intelligent Crop & Fertilizer Recommendation Platform

Python, Scikit-Learn, Flask, Machine Learning

Lead Developer

Jun 2026

- Engineered an AI-driven agricultural decision support engine using Scikit-Learn to analyze soil composition (N, P, K, pH) and climate parameters.
- Achieved 90% crop classification accuracy (Random Forest) and 99.33% fertilizer recommendation accuracy (XGBoost), reducing fertilizer waste by 20–35%.

Heartbleed Vulnerability Research & Security Analysis Lab

Python, Wireshark, VirtualBox, Linux

Security Researcher

Jun 2026

- Constructed a secure, isolated sandbox environment using VirtualBox and Linux to analyze TLS heartbeat messages and intercept

private keys.

- Conducted deep packet inspection using Wireshark to trace memory disclosure payloads during simulated Heartbleed exploits.

EDUCATION

Karunya Institute of Technology and Sciences

2022 – 2026

B.Tech in Artificial Intelligence and Data Science (CGPA: 8.38/10.0)

Coimbatore, Tamil Nadu, India

Velammal Bodhi Campus

2020 – 2022

Higher Secondary Education (Score: 83.0%)

Madurai, Tamil Nadu, India

CERTIFICATIONS

AI & ML: Deep Learning with TensorFlow (Infosys) | Machine Learning using Python (Infosys) | AI Fundamentals with IBM (Cisco) | RPA Basics (Coursera)

Data & Software: Data Analytics Essentials (Cisco) | Tableau and Data Analytics (Infosys) | Agile and GitHub (Infosys) | JavaScript Essentials 1 & 2 (Cisco) | Cybersecurity and Privacy (NPTEL) | Human Computer Interaction (NPTEL)
